

SPIS TREŚCI

1. Milan ÁBEL, Ján VIŇÁŠ, Ľuboš KAŠČÁK: Influence of deformation on a lifetime of welding tips of resistance spot electrodes	7
2. Milan ÁBEL, Ján VIŇÁŠ, Ľuboš KAŠČÁK, Dagmar DRAGANOVSKÁ: Metallographic analysis of electrode materials for resistance spot welding	13
3. Ali A. ASHRAF: Wear characteristic of exfoliated graphite nano sheets/copper metal matrix composite	19
4. Velina BOZDOUGANOVA: A quadrilateral hybrid-stress macro-element with incompatible internal displacements	27
5. Marino BRČIĆ, Marko ČANADIJA, Josip BRNIĆ: Structural model of a carbon nanotube	35
6. Janette BREZINOVÁ, Anna GUZANOVÁ: The thermal balance of mechanical shot peening process	43
7. Janette BREZINOVÁ, Anna GUZANOVÁ: Possibility of mechanical deposition of protective Zn coatings	47
8. Mahmoud CHIZARI, Bin WANG, Mel BARRETT: Introducing a failure criteria for a living cell during microinjection	55
9. Krassimir DOTCHEV: Rapid manufacturing of castform patterns for investment casting	65
10. Mariana DOTCHEVA, Huw MILLWARD: Optimisation of up- and down-milling processes for a corner feature	73
11. Mariana DOTCHEVA, Daniel THOMAS, Huw MILLWARD: Design and rapid manufacture of selected cellular type structures	81
12. Kazimiera DUDEK: The decorative properties of burnished surface layers	89
13. Andrzej DZIERWA, Paweł PAWLUS: Selected properties of chromium coating elements after shot peening	97
14. Miroslav GOMBÁR, Sergej HLOCH: Anodic oxidation factors analysis significance	101
15. Grzegorz GORCZYCA: Effective project management	105
16. Ivan G. GRABAR, E.G. OPANASYUK, Elena V. ZABASHTA, Dima B. BEGERSKIY: Mathematical model of motion of pneumatic tyre on dry soil	109
17. Attila HERDITZKY, Maria KICKOVA: Life cycle increasing of mechanical components using thermal coatings with recasts	117
18. Sergej HLOCH, Jan VALÍČEK, Katarína MONKOVÁ: Experimental analysis of AISI 304 surface irregularities created by abrasive waterjet by means of 3D optical measurement	123
19. Andrey V. ILCHENKO, Elena V. ZABASHTA, VLADIMIR A. LOMAKIN: Change of the moment of inertia of V-type crank-connecting rod mechanism of internal combustion engine	129
20. Milenko JOKIC, Marko CANADIJA: Physical and numerical model of thermomechanical behavior of cooking vessel	137
21. Michail KARSHAKOV, Nely GEORGIEVA: Dynamics of the mobile two-skiving block in the hole's cutting	145
22. Michail KARSHAKOV: Parameters of the cutting layers with turning by round cutting inserts	151

23. Ľuboš KAŠČÁK, Emil SPIŠÁK: Evaluations of properties of clinching and resistance spot welding	161
24. Michail KHEIFETZ, Sergey KOUKHTA, Gennady PREMENT, Sergey KLIMENKO: Choice of design decisions during modelling transfer of parameters of quality of details of machines	167
25. Katarzyna KORZYŃSKA: A method of evaluating environmental aspects in the iso 14001 environmental management systems	175
26. Vasil KOSTADINOV, Michail K. KARSHAKOV: Processing of the grooves through surface plastic deformation	181
27. Vasil KOSTADINOV: Combined tools for surface plastic deformation with radial feed	185
28. Valerii KYRYLOVYCH, Oleksandr PIDTYCHENKO: Automated technological equipment layout in industrial robots' working area having complicated shape	189
29. Kirill L. LEVINE, Jude O. IROH: Influence of polypyrrole on curing of poly (amic acid)	197
30. Katarína MONKOVÁ, Jan VALÍČEK, Sergej HLOCH: The suggestion of new manufacturing technology for hand-made screw blade for wind-power plant	205
31. Irena NOWOTYŃSKA: The use of numerical image analysis for determine of strain distribution in layered composites during extrusion	211
32. Pavol PAPCUN, Daniel JANKURA: Structure and adhesive properties of ceramic and composite coatings on Al ₂ O ₃ base	217
33. Masud M. PARVEZ, Mojahidul HQUE, Tamas SZECSI: A study of different manufacturing feature recognition methods	221
34. Paweł PAWLUS, Andrzej DZIERWA: Functional importance of surface topography parameters	229
35. Alexandre POLOZINE, Lírio SCHAEFFER: Testing of thermocouples in the high gradient temperature field	239
36. Agáta RADVANSKÁ, Sergej HLOCH: Experimental analysis of the dust at plasma cutting ..	245
37. Ján SLOTA, Ivan GAJDOŠ: The application of rapid prototyping, CAE and cam methods in product development processes	251
38. Victor SPUSKANYUK, Alexander DAVIDENKO, Alexander GANGALO: New method of calculating the equal channel angular extrusion pressure	257
39. Wictor SHABAJKOWITCH: A new approach in development of technological processes	261
40. Slawomir SWIRAD: The effect of burnishing parameters on steel fatigue strength	267
41. Jana TKACOVA, Monika MADEJ, Eva LUKCOVA: Analysis of selected properties of DLC films	273
42. Pavel TOPALĚ, Laurențiu SLĂTINEANU, Oana DODUN, Natalia PÎNZARU: Influence of some factors on the powder deposition process by electrical discharges	277
43. Jan VALÍČEK, Sergej HLOCH, Katarína MONKOVÁ: Identification of surface texture created by the abrasive waterjet and a proposal for criteria for its evaluation	283
44. Alexandr VASILIEV, Michail KHEIFETZ, Sergey KOUKHTA, Gennady PREMENT: Formation of quality indexes of machine details on the basis of technological inheritance	291
45. Ján VIŇÁŠ, Ľuboš KAŠČÁK, Dagmar DRAGANOVSKÁ, Milan ÁBEL: The choice factors analysis influencing quality of mig brazed joints of galvanized steel sheets	299
46. Eva ZDRAVECKÁ, Jaroslav BRIANČIN, Štefan FECSU: Analysis of selected properties of PVD films	305
47. Nikola ŽIVKOVIĆ, Predrag STEFANOVIĆ, Dejan CVETINOVIC: Coal powder fractions distribution in thermal power plant mixture channel presented by numerical calculations	311
Index of authors	319
